

#### Exercise 4

---

- 1) Write a JAVA program to implement class mechanism. – Create a class (Student), define data members (Roll\_no, name, marks), constructor, methods (setData(args), getData()) and invoke them inside main method.
- 2) Write a program in JAVA to show the use of 'this' keyword when parameters and instance variables are the same.
- 3) Write a program in JAVA to implement constructor chaining. The program should enable creation of objects with three arguments (Roll\_no, name, marks) and four arguments (Roll\_no, name, marks, fee)
