1. Write a Java program to implement the concept of importing classes from user defined package.

2. Write a program to make a package Balance. This has an Account class with Display_Balance method. Import Balance package in another program to access Display_Balance method of Account class.

3. WAP to create a package p with class A with 4 types of access protected methods. Show which of these methods can be used in different package's class i.e. there is main() in class B in package Q and 4 methods are in Class A in package p.
